PLENVU® (polyethylene glycol 3350, sodium ascorbate, sodium sulfate, ascorbic acid, sodium chloride and potassium chloride for oral solution)

The information contained in this Medication Guide is intended for use by your healthcare provider and patient. This Medication Guide is not a substitute for your healthcare provider's instructions to take PLENVU the right way.

**What is PLENVU?**

PLENVU is a prescription medicine used in adults to clean the colon before a colonoscopy. Taking PLENVU helps your healthcare provider see inside your colon when performing a colonoscopy.

It is not known if PLENVU will work in children younger than 18 years of age. Use PLENVU only under the care of your healthcare provider.

**Who should NOT take PLENVU?**

Do not take PLENVU if you have:

- An allergy to any of the ingredients in PLENVU. See the end of this leaflet for a complete list of PLENVU ingredients.
- A medical condition that may be made worse by diarrhea or dehydration.
- A history of severe bowel problems (ischemic colitis).

**How should I take PLENVU?**

See the "Instructions for Use" for driving instructions. You must read, understand, and follow these instructions carefully. If you have questions or concern about how to take PLENVU, contact your healthcare provider.

**What is the most important information I should know about PLENVU?**

PLENVU and other bowel preparations can cause serious side effects, including:

- Serious loss of fluid (dehydration) and changes in blood salts (electrolytes) in your blood. These changes can cause:
  - Abnormal heartbeats that can cause death
  - Seizures
  - Anemia
  - Hypoglycemia
  - Heart problems.

- Mucosal ulcerations: Tell your healthcare provider right away if you have any of these symptoms of serious loss of fluid (dehydration) while taking PLENVU:
  - Abdominal pain/discomfort
  - Fever
  - Vomiting
  - Diarrhea

- The most common side effects of PLENVU include:
  - Vomiting
  - Diarrhea
  - Dehydration
  - Mucosal ulcerations

**What are the possible side effects of PLENVU?**

For more information about side effects, contact your healthcare provider or see "How to Use PLENVU".

**Before taking PLENVU, tell your healthcare provider about all of your medical conditions, including:

- Problems with serious loss of fluid (dehydration) and changes in blood salts (electrolytes)
- Heart problems
- Seizures
- New or worsening bowel or rectal bleeding
- Low blood pressure
- Anemia
- Kidney problems
- High blood pressure
- Non-steroidal anti-inflammatory drugs (NSAIDs)
- Other medicines
- Drinking alcohol
- Benzodiazepines
- Cardiovascular medications
- Seizures
- Renal impairment

**Ask your healthcare provider or pharmacist for a list of these medicines when you start or stop taking PLENVU.**

**Tell your doctor about the medicines you take, including prescription and over-the-counter medicines, vitamins, and herbal supplements.**

PLENVU may affect how other medicines work.

Do not take medicines by mouth 1 hour before or after the start of PLENVU.

**How to Use PLENVU**

See the "Instructions for Use" for driving instructions. You must read, understand, and follow these instructions carefully. If you have questions or concern about how to use PLENVU, contact your healthcare provider.

To follow the directions in the

**One-Day Morning Dosing Schedule**

1. Take Dose 1 two hours after you start taking PLENVU. Mix three bottles of PLENVU and shake the water and PLENVU until it is completely dissolved. This can take 2 to 3 minutes.

2. Mix the vial and PLENVU together with a spoon or put it in the mixing container securely and shake the water and PLENVU until it is completely dissolved. This can take 2 to 3 minutes.

3. After taking PLENVU, you may be feeling or feeling like your stomach is upset. Wait to take Dose 2 until your stomach feels better.

**Two-Day Split-Dosing Schedule**

1. Take Dose 1 the morning of the day before the colonoscopy. This should be about 12 hours (between about 4 am and 8 am) after you start taking Dose 1. Mix three bottles of PLENVU and shake the water and PLENVU until it is completely dissolved. This can take 2 to 3 minutes.

2. Drink the water contents of the mixing container over the next 30 minutes.

3. After taking PLENVU, you may be feeling or feeling like your stomach is upset. Wait to take Dose 2 until your stomach feels better.

4. Mix the vial and PLENVU together with a spoon or put it in the mixing container securely and shake the water and PLENVU until it is completely dissolved. This can take 2 to 3 minutes.

5. After taking PLENVU, you may be feeling or feeling like your stomach is upset. Wait to take Dose 2 until your stomach feels better.

6. Mix the vial and PLENVU together with a spoon or put it in the mixing container securely and shake the water and PLENVU until it is completely dissolved. This can take 2 to 3 minutes.

7. After taking PLENVU, you may be feeling or feeling like your stomach is upset. Wait to take Dose 2 until your stomach feels better.
